

Executive Post Graduate Programme in Management

EPGP-One Year Full-Time Residential Programme

The EPGP is a one year, full-time residential programme created specifically for professionals with remarkable track records and seven to fifteen years of experience. Challenging, intensive and globally-oriented, the EPGP is designed to enhance the skills and capabilities essential for responsible positions at senior management levels.

EPGP curriculum is organized around a series of core courses and electives to provide a solid foundation of key management theory and practice. Themes drawn from the realm of the social sciences have been integrated into the programme in a structured manner leading to a nuanced, multi-layered understanding of management issues. Classroom teaching is supplemented with extensive case analysis as well as a Comprehensive Project which offers students an opportunity to integrate learning from the programme and apply it to a real management problem or an impending business opportunity.

A focus on emerging markets is at the core of the EPGP, highlighted by an international immersion module which includes an experiential full week study tour to an emerging economy like Brazil, South Africa or China, or a developed one in the Asian region like South Korea, in partnership with a leading business school in the host country. The intensive analysis, reflection and classroom discussion following the visit enables students to broaden their understanding of an increasingly globalized business environment.

The EPGP incorporates a seminar series, anchored by experts and practitioners in diverse fields such as liberal arts, sociology, NGOs, sports, media and international development, as well as prominent members of the corporate world. The broad range of ideas and perspectives from both inside and outside the world of management provides a fertile ground for holistic leadership development.

With a combination of maturity, analytic insight and solid academic credentials, graduates of the EPGP are ideally prepared to be future leaders who can achieve outstanding results in a dynamic corporate environment.
